

Banking Customer Analytics

Data-driven insights from 3,000+ customer records

BANKING & FINANCIAL SERVICES

PYTHON · SQL · TABLEAU

Uncovering Customer Value & Risk

Uneven Distribution

Limited segment drives majority of deposits

Risk Exposure

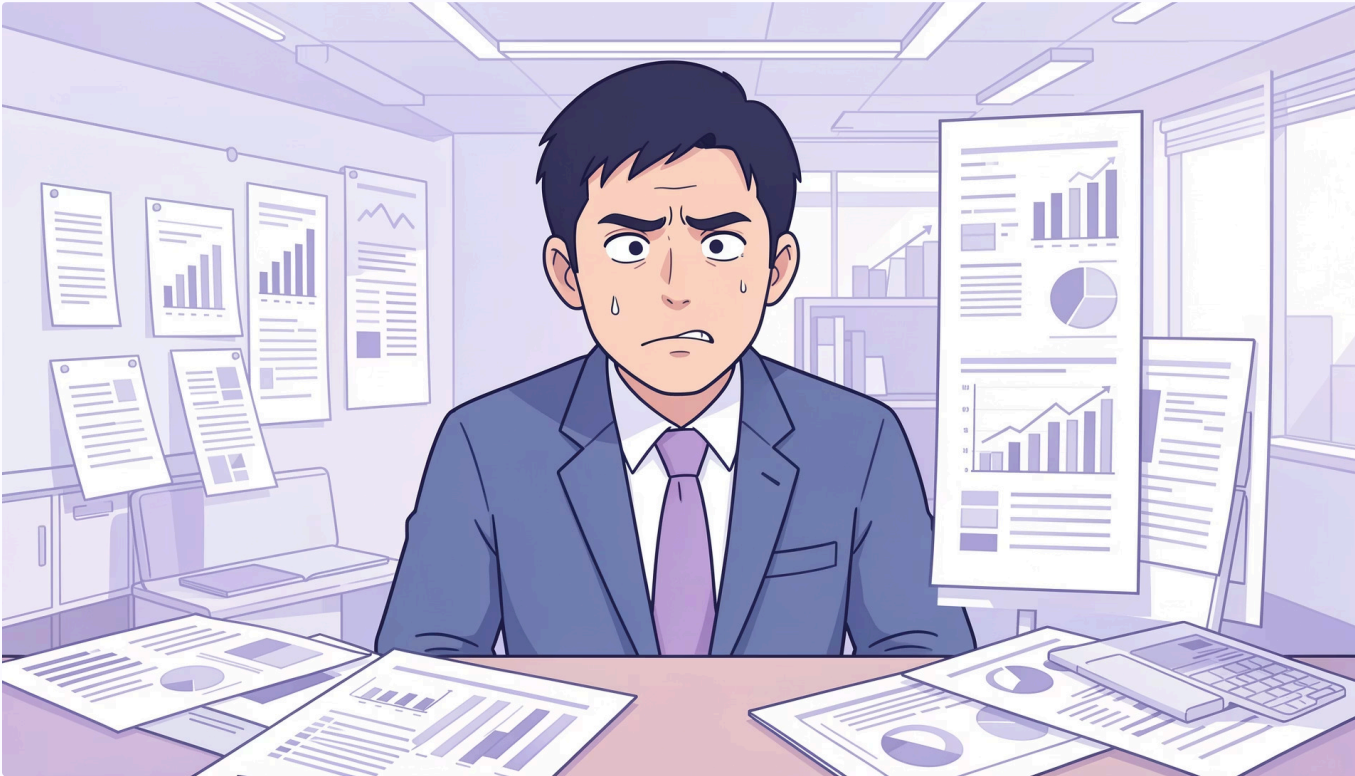

Loan exposure exceeds deposits for key subset

Strategic Action

Enable informed customer prioritization decisions

The Business Challenge

Leadership lacked consolidated view

- Which customers contribute most to deposits?
- Where is lending risk concentrated?
- How do relationship strategies perform?

Decisions were reactive, not strategic

What We Set Out to Achieve

01

Quantify Deposits

Total and average across portfolio

02

Identify Segments

High-value and high-risk customers

03

Evaluate Loyalty

Classifications vs. actual contribution

04

Assess Performance

Advisor and relationship KPIs

05

Support Decisions

Clear numerical evidence for leadership

Portfolio at a Glance

₹2.01B

Total Bank Deposits

Significant asset volume
under management

₹6.72L

Average Deposit

Per customer across portfolio

₹2.60B

Business Lending

Total loan exposure

3,000

Customers Analyzed

Comprehensive dataset
coverage

Key Insight: High lending exposure reinforces need for risk-aware monitoring

Analytical Approach

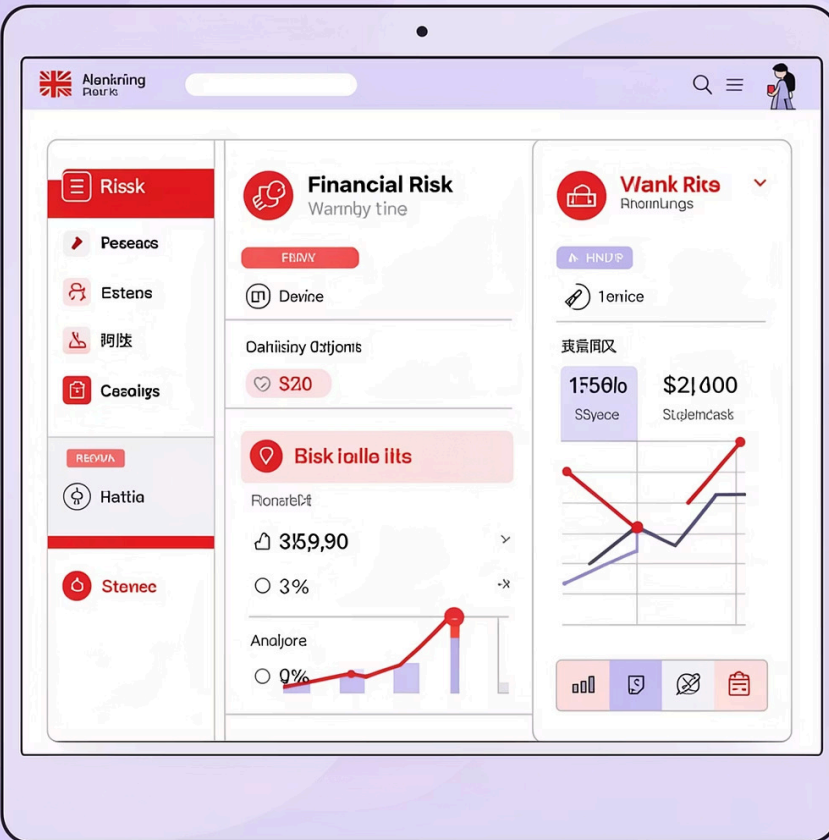

Tools applied complementarily to align analytics with business needs

Key Metrics Defined

- Total & average deposits
- Lending exposure
- Loan-to-deposit ratios
- Loyalty segment deposits
- Advisor-level assets

Critical Findings

Deposit Concentration

Higher loyalty tiers hold disproportionate share of total deposits. Lower-tier segments show significantly lower balances.

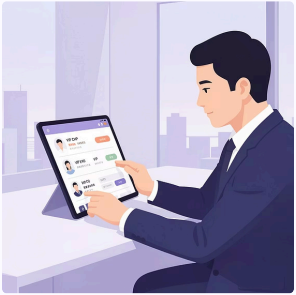

Risk Exposure Alert

Measurable subset holds **loan balances exceeding deposits**, indicating elevated financial risk.

Performance Gaps

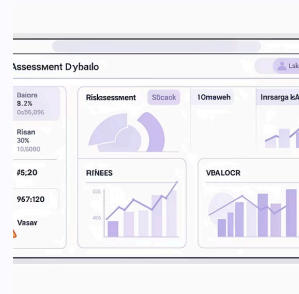

Small number of advisors manage large portion of assets. Material variation in deposit contribution by advisor.

Strategic Actions for Leadership

Prioritize High-Value Customers

Focus engagement on highest deposit contributors

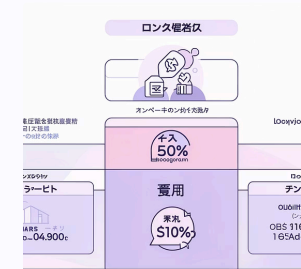

Strengthen Risk Monitoring

Proactive reviews for unfavorable loan-to-deposit positions

Optimize Advisory Allocation

Align assignments based on measurable performance

Refine Loyalty Strategy

Reassess classifications to reflect actual financial value

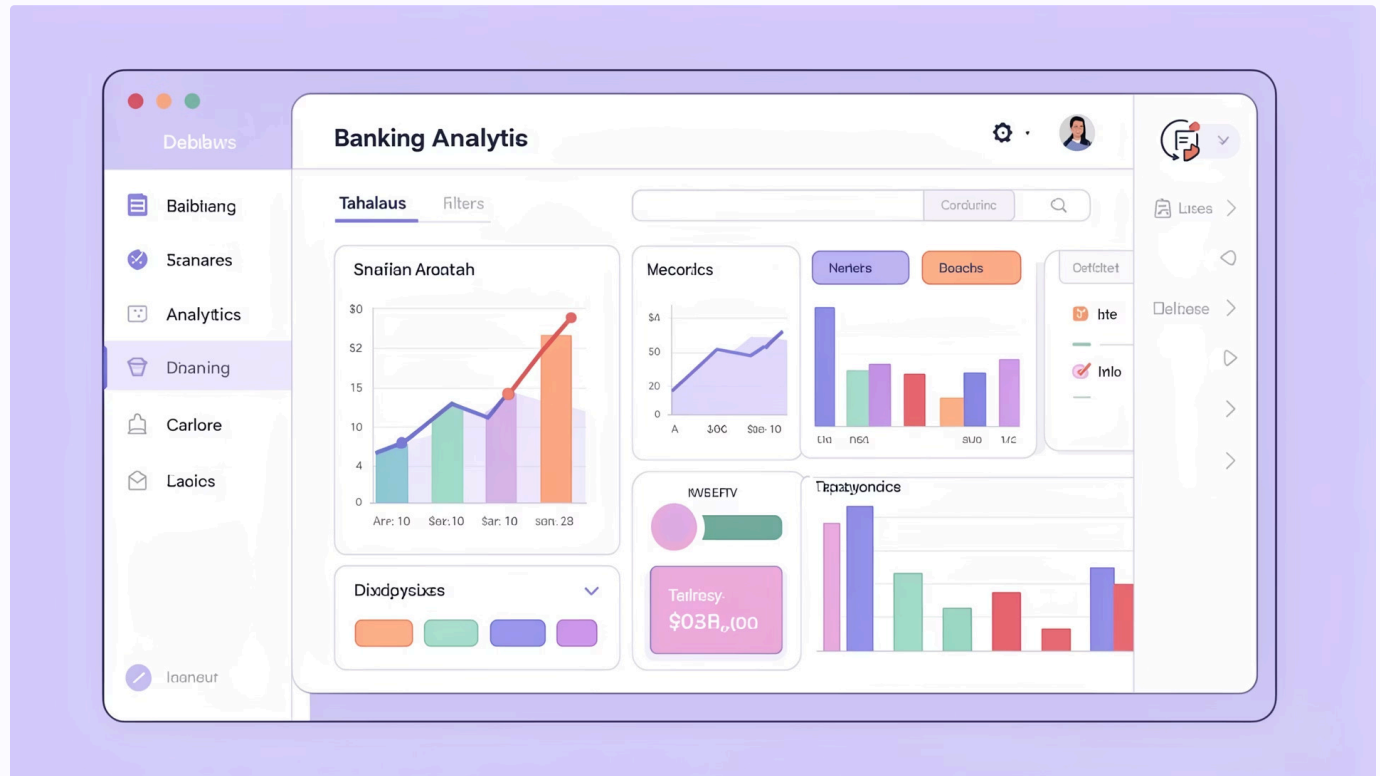

Dashboard & Monitoring

Interactive Tableau Dashboards

Developed for leadership reviews and ongoing monitoring:

- Deposit and loan distribution by segment
- High-value and high-risk customer identification
- Advisor-level performance metrics
- Interactive filters for scenario analysis

📄 Dashboards enable exploration; this report focuses on insights and decisions

Business Impact & Next Steps

Immediate Impact

Leadership now has clear visibility into customer value concentration, lending risk, and relationship effectiveness.

Future Opportunities

- Predictive risk and churn modeling
- Time-based trend analysis
- Transactional behavior integration
- Regional and branch-level expansion

Raw data converted into decision-ready insights
